1.0 Create Course Catalogue for the Build in the District View

1.1 District Course Catalogue

The district course catalogue should be reviewed and adjusted each year, as necessary.

Course flavours in MyEdBC allow a district and/or school to make copies of courses.

Note: Course flavours must be created at the district level before the school can create a flavour. See the section 1.3 Creating Copies of Courses (Flavours) at the District Level.

1.1.1 Copy District Course Catalogue

The first step for preparing courses for the coming year is to copy the District course catalogue forward to the next year. This process will only copy courses, from your District, that exist in the Enterprise Level Catalogue for the same year.

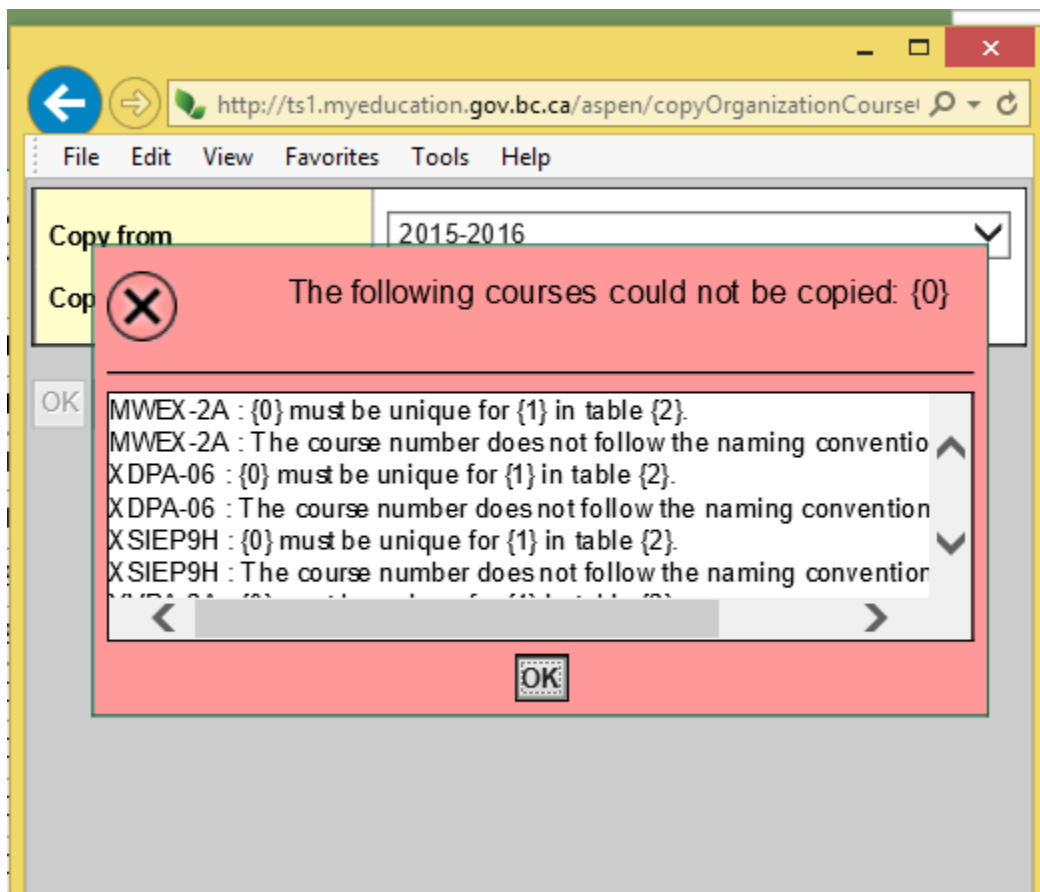

- Log on to the District view
- Click the Schedule top tab
- Click the Courses side tab
- Click Options and select Copy Course Catalogue...
- The following window will open:

The screenshot shows the MyEdBC interface for Richmond 2017-2018. The 'Schedule' tab is selected. The 'Courses' side menu is open, and the 'Options' dropdown is showing 'Copy Course Catalogue...'. A dialog box is open with 'Copy from' set to 2017-2018 and 'Copy to' set to 2018-2019. A red arrow points from the 'Copy Course Catalogue...' menu item to the dialog box.

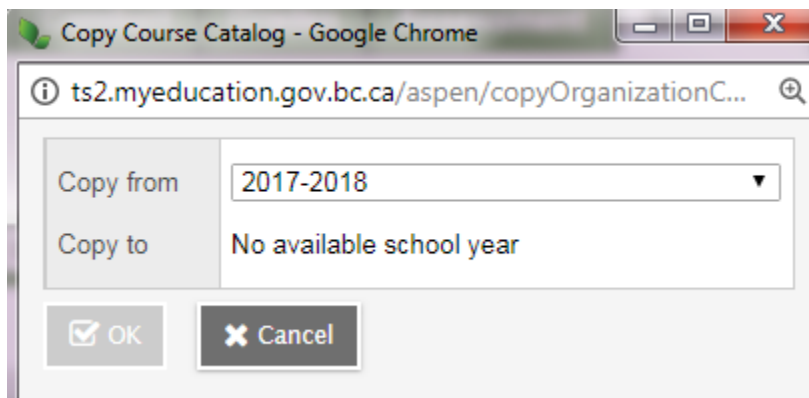

- Select the Year to **Copy from** and the **Copy to** year.

There may be courses that do not copy and you will be presented with a similar message to this:

Courses listed in this window are ones that existed in the District catalogue and do not have a match in the Enterprise course catalogue.

Courses at the District level can only be copied once. If a single course exists in the next year, the application prevents copying forward. The user will be presented with the following dialogue box:

1.1.2 Adding Courses to the District Course Catalogue

If you need additional courses, which were not in the current year they can be added for use next year.

- Log on to the District view
- Click the Schedule top tab
- Click the Courses side tab
- Click Options and select Add.
- The Course Pick List pop-up window appears.
- In the *Course Catalogue* date field select the dates for the next school year.
- In the *Department* field, select *All*. This will ensure you see all courses at the Enterprise level.

Note: Only courses that are not already in the year's catalogue will appear.

<input type="checkbox"/>	CrsCode	Description	Department
<input type="checkbox"/>	A3DP-12	AP 3-D DESIGN PORTFOLIO 12	
<input type="checkbox"/>	ABI--12	AP GENERAL BIOLOGY 12	
<input type="checkbox"/>	ACAL-2B	AP CALCULUS BC 12B	
<input type="checkbox"/>	ACGP-12	AP COMPARATIVE GOVERNMENT & POLITICS 12	
<input type="checkbox"/>	ACH--12	AP GENERAL CHEMISTRY 12	

- Check the box beside the course(s) you would like to add.
- Click OK.
- Go to the Courses side-tab and perform a search for the course you selected.
- Check the box beside the course and click the Details leaf.
- Populate the fields as appropriate for the district.
- Click Save.

Repeat until all courses required by the district are displayed in the Course list.

1.1.3 Course Packages

Course packages are a special type of course used during the scheduling process. Course packages are used as a way to assign multiple *course requests* to a student or groups of students. A course package of Grade 8 Core courses, for example, can be created and then assigned to all incoming grade 8 students. Other examples may be for courses that make up an elective rotation, like Applied Skills and/or Fine Arts. Flavors of course packages can be created, just like other courses.

The following course packages have been created at the Enterprise level.

PKG--K	COURSE PACKAGE K	PKG--K		N		0.0	KF	Elementary	Other	Pseudo-Crs-NOT FUND
PKG-01	COURSE PACKAGE 01	PKG-01		N		0.0	01	Elementary	Other	Pseudo-Crs-NOT FUND
PKG-02	COURSE PACKAGE 02	PKG-02		N		0.0	02	Elementary	Other	Pseudo-Crs-NOT FUND
PKG-03	COURSE PACKAGE 03	PKG-03		N		0.0	03	Elementary	Other	Pseudo-Crs-NOT FUND
PKG-04	COURSE PACKAGE 04	PKG-04		N		0.0	04	Elementary	Other	Pseudo-Crs-NOT FUND
PKG-05	COURSE PACKAGE 05	PKG-05		N		0.0	05	Elementary	Other	Pseudo-Crs-NOT FUND
PKG-06	COURSE PACKAGE 06	PKG-06		N		0.0	06	Middle	Other	Pseudo-Crs-NOT FUND
PKG-07	COURSE PACKAGE 07	PKG-07		N		0.0	07	Middle	Other	Pseudo-Crs-NOT FUND
PKG-08	COURSE PACKAGE 08	PKG-08		N		0.0	08	Middle	Other	Pseudo-Crs-NOT FUND
PKG-09	COURSE PACKAGE 09	PKG-09		N		0.0	09	Secondary	Other	Pseudo-Crs-NOT FUND
PKG-10	COURSE PACKAGE 10	PKG-10		N		0.0	10	Secondary	Other	Pseudo-Crs-NOT FUND
PKG-11	COURSE PACKAGE 11	PKG-11		N		0.0	11	Secondary	Other	Pseudo-Crs-NOT FUND
PKG-12	COURSE PACKAGE 12	PKG-12		N		0.0	12	Secondary	Other	Pseudo-Crs-NOT FUND

Individual courses included in the package can be setup in the School or Build view (details of steps are included in the section on school course catalogue).

1.2 District Preferences > Schedule

In District Setup > Preferences > under the Category of Schedule, settings determine how the schools can use courses.

The screenshot shows the 'Organization Setup :: Chilliwack' interface. The 'Schedule' category is selected in the 'Category' dropdown. The 'Basic' tab is active, showing the following settings:

- Auto update school course:**
- Course Field Ownership:**
 - Academic level: School
 - Description: School
 - Grade level: Enterprise
 - Master type: Enterprise
 - Number: School
 - Short description: Chilliwack
- Credit:** School
- GPA inclusion indicator:** School
- Hide from grade input:** School
- Hide from report card:** School
- Hide from transcript:** Chilliwack
- Hide from attendance:** School
- Honor roll type:** School
- Weight:** School
- Alternate group:** School
- Department:** School
- Minimum minutes per session:** Chilliwack
- Summary:** Chilliwack
- Teacher preparation code:** School
- Total minutes per cycle:** Chilliwack

Field	Default Value	Comment
Auto Update school course	checked	Checked: Any changes to a district course will be automatically pushed down to the school courses <i>if the related scheduling field is district-owned.</i> Unchecked: Any changes to a district course will NOT be automatically pushed down to the school courses <i>if the scheduling field is district-owned.</i>
Course Field Ownership: Academic level	District	Academic Level is used for GPA. This field is open for districts to make available to schools or not via District TT > Setup > Preferences > Schedule.
Course Field Ownership: Description	School	District Name: set to district name if schools should not be able to adjust the description of a course. School: set to school if schools will be permitted to edit the description of a course in School >Schedule >.Courses > Details
Course Field Ownership: Grade level	Enterprise	Setting is Enterprise only.
Course Field Ownership: Master type	Enterprise	Setting is Enterprise only.
Course Field Ownership: Number	School	District Name: set to district name if schools will not be creating course flavours (multiple versions of a course). School: set to school if schools will be creating course flavours per the course number mask.
Course Field Ownership: Short description	District	District Name: set to district name if schools should not be able to adjust the short description of a course. School: set to school if schools will be permitted to edit the short description of a course School > Schedule >.Courses > Details.
Course Field Ownership: Credit	District	Credit values default from the Enterprise level, but are editable by Districts or schools to allow for BAA course credit definitions. District Name: set to district name if schools should not be able to adjust the credit value of a course. School: set to school if schools will be permitted to edit the credit value of a course in School > Schedule >.Courses > Details.
Course Field Ownership: GPA Inclusion indicator	District	District name: prevents schools from choosing whether a course will be included in GPA calculations. School: The default value from the district course attribute can be adjusted by the school. School is the suggested setting for BC school districts.
Course Field Ownership: Hide from grade input	District	District name: Prevents schools from choosing whether a course set with this value at the district level will be visible for reporting on. Gradebooks will not be created for courses with this setting. School: The default value from the district course attribute can be adjusted by the school. School is the suggested setting for BC school districts.

Field	Default Value	Comment
<u>Course Field Ownership:</u> Hide from report card	District	District name: Prevents schools from choosing whether a course set with this value at the district level will appear on report cards. School: The default value from the district course attribute can be adjusted by the school. School is the suggested setting for BC school districts.
<u>Course Field Ownership:</u> Hide from transcript	District	District name: Prevents schools from choosing whether a course set with this value at the district level will appear on transcripts. School: The default value from the district course attribute can be adjusted by the school. School is the suggested setting for BC school districts.
<u>Honor roll type</u>		District name: Prevents schools from choosing whether a course set with this value at the district level will appear on transcripts. School: The default value from the district course attribute can be adjusted by the school. School is the suggested setting for BC school districts.
<u>Course Field Ownership:</u> Weight	District	Used in scheduling.
<u>Course Field Ownership:</u> Alternate group	District	Alternate group is a means of categorizing Alternate course selections into groups
<u>Course Field Ownership:</u> Department	District	Define if District or School can edit the department value on a course.
<u>Course Field Ownership:</u> Minimum minutes per session	District	Setting used with in the application for Elementary timetable builder, that is not used in BC
<u>Course Field Ownership:</u> Summary	District	District name: Prevents schools from entering a narrative for a course. School: The default text from the district course attribute can be adjusted by the school or the school can create their own in School > Schedule > Courses > Details.
<u>Course Field Ownership:</u> <u>Teacher preparation code</u>	District	Used for grouping sections together when scheduling teachers.
<u>Course Field Ownership:</u> Total minutes per cycle	District	Setting used with in the application for Elementary timetable builder, that is not used in BC

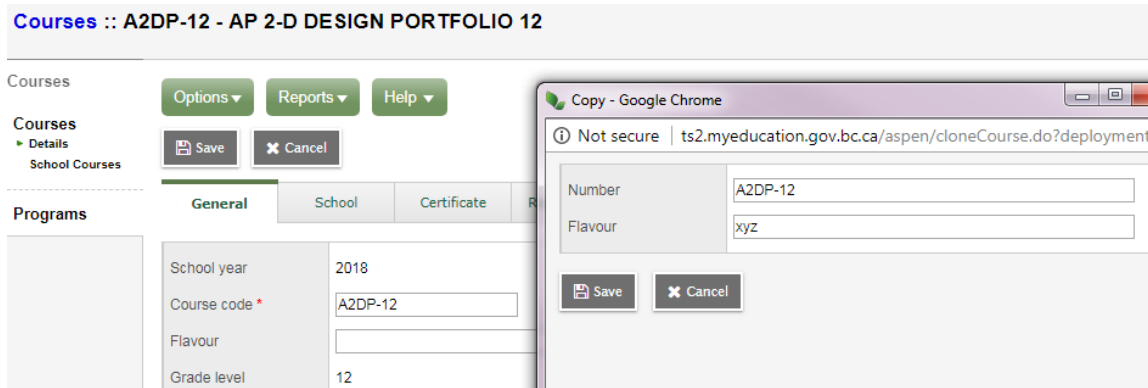

Field	Default Value	Comment
<u>Advanced>Miscellaneous Course number mask</u> Note: In order for schools to create flavours, the district must create the flavour first. The schools then create a flavour of the district flavour.	blank	Blank: district can create course flavours. Only one version of each provincial course code can be brought into the district course catalogue. District will be required to put 3 characters on the end of the course code. aaaaaaaaab: District must create a flavour and add three characters to the enterprise course code. School can create flavours of the district flavour and can add up to one character to the district course code. aaaaaaaaabb: District must create a flavour and add three characters to the enterprise course code. School can create flavours of the district flavour and can add up to two characters to the district course code. aaaaaaaaabbb: District must create a flavour and add three characters to the enterprise course code. School can create flavours of the district flavour and can add up to three characters to the district course code.
<u>Course Field Ownership: Hide from Attendance</u>	District	Hide from attendance feature hides/un-hide a course from taking attendance. This drop down is use to cascade hide from attendance functionality to school level.

1.3 Creating Copies of Courses (Flavours) at the District Level

Flavours present a concept in MyEd that relates to copies of courses, in this case referring to district copies of Enterprise courses. A flavour is added to the copy of a course in a field of its own. This is a requirement of the application when creating different versions of a course, but the flavour does not have any relevance to schedule building or student scheduling. The course number mask requires districts to add 3 characters to the ministry codes. Districts can set the maximum number of additional characters schools might choose to add to school level copies of these codes for their scheduling needs. Schools can then make as many copies with distinct codes and flavours as they require.

- Log on to the District view.
- Click the Schedule top tab.
- Click the Courses side tab.
- Check the box beside the course that requires a flavour.
- Click the Details leaf.
- Click Options on the menu and select Copy.
- Populate the Number field with the course code you are copying, adding three characters to the end.
- Populate the Flavor field with a description of the copied course – this may be a course code or description.

Note: The Flavour field is just a description of the course.

- Click Save.
- Return to the Courses side tab. The course flavour will now appear in the district course catalogue. Schools can see this flavour, bring it into their own school and create additional flavours. Instructions for creating flavours at the school level are in the School Setup document.

2.0 Define the Build Year Context

You MUST correctly set this value to the next school year to prevent overwrite of the current year's schedule.

This value tells the application what the next year is going to be.

This can be set for all school in the district:

District > Schools > Options > Mass Update > Field = Build Year Context > Value = date for the next school year

OR individual at each school

School > Setup > Details > Build Year Context field

School level Steps:

1. Click the red X and delete the existing value
2. Save the record
3. Click the magnifying glass
4. In the pop up window select the next school year
5. Click OK
6. Click Save on the School Details screen.

3.0 Create Course Catalogue for the Build Year

Schools have the means of copying their current year course catalogue to the build year. They can also pull courses from the district to create or add to their course catalogues.

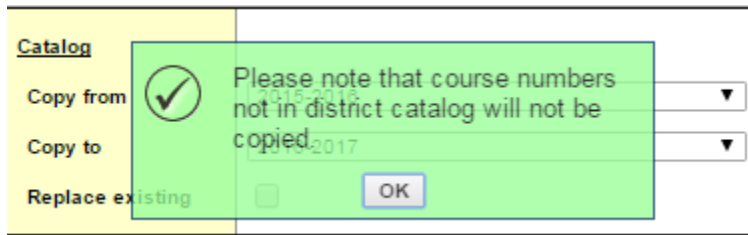

3.1 Copying the School Course Catalogue

School course catalogues can be copied forward from one year to the next. In order to do so, the course must first exist in the district course catalogue. This process is similar to that for the district course catalogue as described in Section 1.1 above.

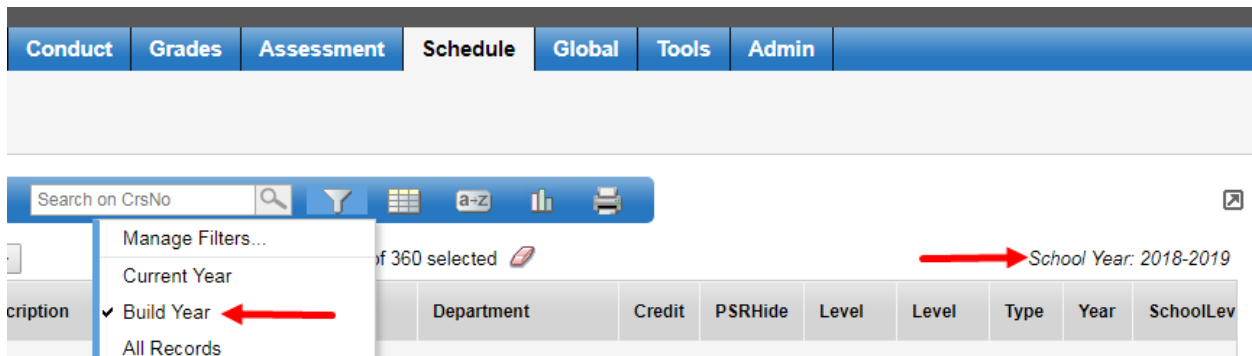

- Log on to the School View
- Click the Schedule top tab
- Click the Courses Side tab
- Go to Options and select, Copy Course Catalog
- From the popup window:
 - Select the year to copy from and the year to copy to
 - Note the option to “Replace existing”
 - Select to Copy all, copy a Selection, or copy from a Snapshot.

- The message shown below displays as a reminder courses must exist in the district course catalogue. Unlike at the district level, there will be no follow up message indicating which courses were not copied as a result of missing from the district catalogue.

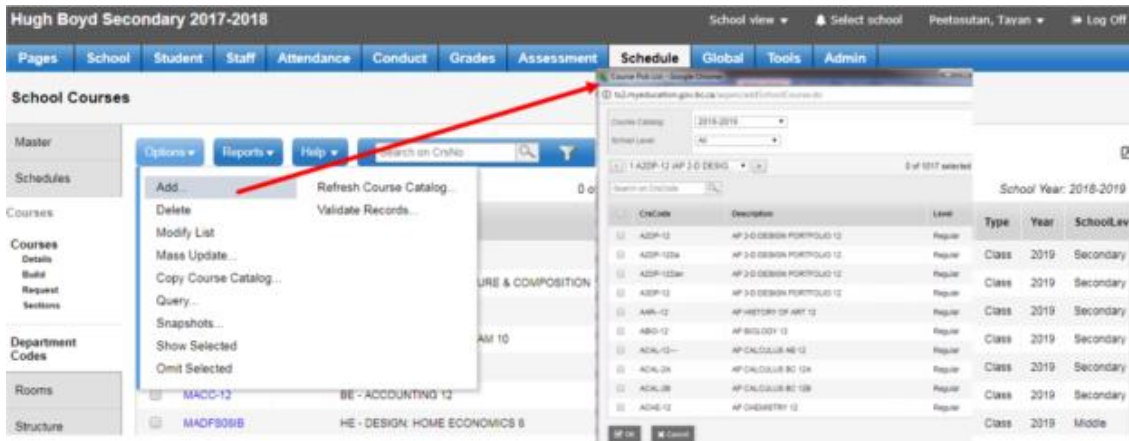

- Once complete, change the filter to the build year and check the number of courses

3.2 Pulling Courses From the District to the School Course Catalogue

- Log on to the School view.
- Click the Schedule top tab.

- Click the Courses side tab.
- Click the icon and ensure Build Year is selected.
- Click Options on the menu and select Add. The Course Pick List pop-up window appears, displaying the district course catalogue. Ensure the Course Catalogue reflects the build year and that School Level field is set to All to view the entire course catalogue.

- Check the box beside the course(s) required.
- Click OK. This adds the selected course(s) to your Courses side tab.
- Go to the Courses side-tab and perform a search for the course you selected.
- Check the box beside the course and click the Details leaf.
- Populate the fields as appropriate for the school.
- Click Save.
- Click on the Grading sub-top tab

Creating Copies of Courses (Flavours) at the School

The ability to create more than one version of a course (course flavours) requires that specific settings are in place at the district level.

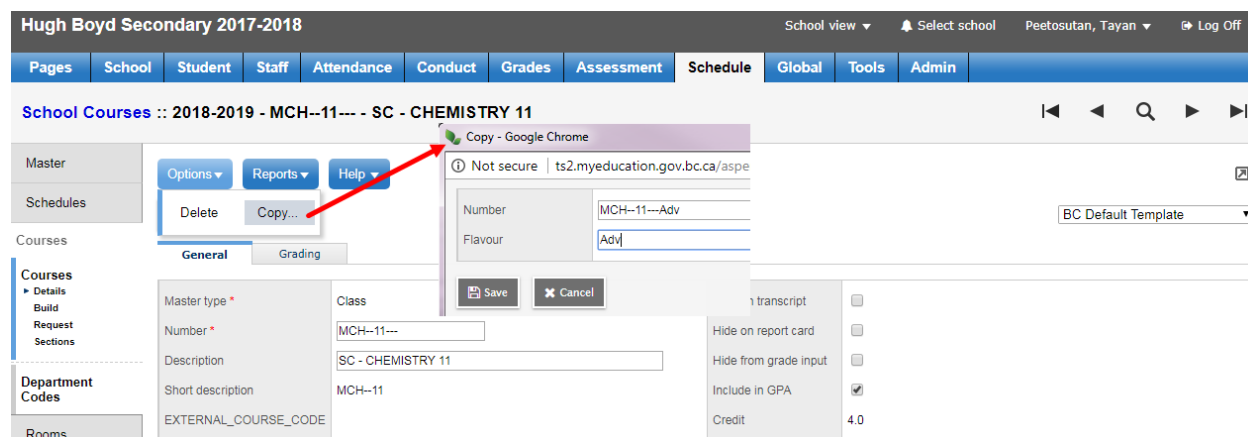

For schools to create copies of courses, the district must have created a copy first. Schools can see this copy (not the flavour), bring it into their own school and create additional copies. A flavour is required but has limited value. Consultation with district support personnel may be required if schools need additional courses created at the district level.

3.2.1 Creating Flavours at the School Level

- Log on to the School view.
- Click the Schedule top tab.
- Click the Courses side tab.
- Check the box beside the course that requires a flavour.
- Click the Details leaf.

- Click Options on the menu and select Copy.
- Populate the Number field with the course code you are copying, adding the appropriate number of characters required by the district preference setting.
- Populate the Flavor field with a description of the copied course – this may be a course code or description.

Note: The Flavour field is just a description. The actual flavour is the unique course code.

- Click Save.
- Return to the Courses side tab. The course copy will now appear in the school course catalogue.
- Populate the details on the General and Grading tabs for the copy.

3.2.2 Setting up Course Packages

Course packages are used to enter requests quickly for a group of courses several students must take. From the Build View > Student > Requests, course packages can be expanded out to those courses contained within.

Begin by making a flavour of the chosen, PKG-- course for the selected grade level. Depending on the District > Setup > Preferences > Category > Schedule, the school may be able to edit the course number (code), description and/or short description. In the lower block, course package field, enter the course codes to be contained within the package.

4.0 Define Next School for Students

Students need to have a Next School value set, in order to assign them course requests. This value can only be set, for Primary Active students at your school.

From the Student top tab in the School view, select the Primary Active Students filter, then the Pre-Transition field set. This field set contains the next school (NextSKL>Name) field. Setting this field determines the student's primary school following End of Year Rollover.

The next school field is mass-updateable. It can also be set using Modify List or from within a student's details screen.

Graduating students do not need a Next School; the next school value for grade 12 students is left blank.

5.0 Rollover Secondary School Assignments for Staff

Primary teachers at your school do not need to be rolled over to the build year. If a teacher exists in the active year, they will be available for scheduling in the Build year.

If you know staff positions we be required next year, but do not know the staff's name fake staff can be created, e.g. Eng1 2016, Eng2 2016

When you are preparing to build your school's schedule for next year, and your teachers have secondary school associations, you can roll over those associations to build the schedule for next year.

To roll over secondary school assignments for staff members:

- Log on to the School view.
- Click the Staff tab.
- On the Options menu, click Rollover Staff Schools. The system asks if you want to roll over the current secondary school staff associations to the build year.
- Click OK.

6.0 Define New Secondary School Assignments for Staff

Defining new secondary school assignments for staff is best managed at the district level by an administrator or L1 Support that has access to all staff. From the Staff top tab in either the School View or District View, click on the Schools side tab > Options > Add. Complete the form as needed.
