

Assessment Results Analysis Report

To look at an Assessment with several strands in one view use the Assessment Results Analysis Report. Use this report for any assessment with multiple strand data.

First click on the FESL Tile in the home screen

Then click on **District Analysis** and then select the Assessment Results Analysis tile

Use the filters to select the grade you wish to look at. For this example, let's use the **NFRA FALL**, that would mean you select **Grades 4, 5, 6, 7** in the filter, then the **NFRA Assessment**, The **NFRA FALL** sub assessment, and finally use all the Sub Assessment Items, Select them all. Then click **view report**

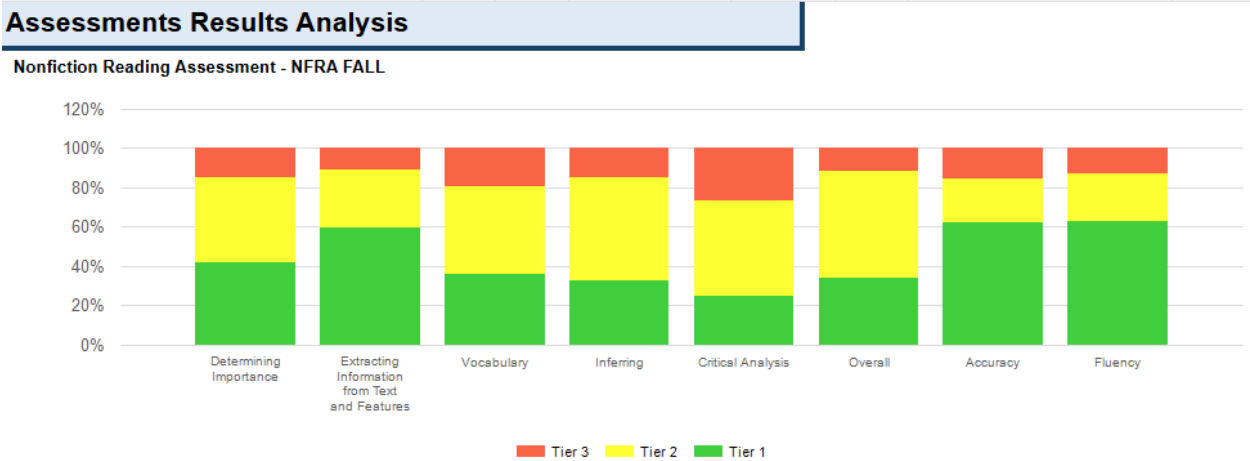

The screenshot shows the 'Assessments Results Analysis' filter page. The breadcrumb trail is 'Home > SD73 > FESL > District Analysis > Assessments Results Analysis'. The page contains several filter sections with dropdown menus. Red arrows point to specific selections: 'Kindergarten FT, Grade 01, Grade 0' in the Grade dropdown, 'NFRA - NFRA FALL' in the Term/Sub-Assessment dropdown, 'NFRA - NFRA FALL - Determining' in the Sub-Assessment Item dropdown, 'Nonfiction Reading Assessment' in the Assessment dropdown, and 'No' in the Show PLU (N/A) dropdown.

Selecting all the sub assessment items will then show all the strand information. You may select the PLU to show yes if you want an indication of how many students have not been entered.

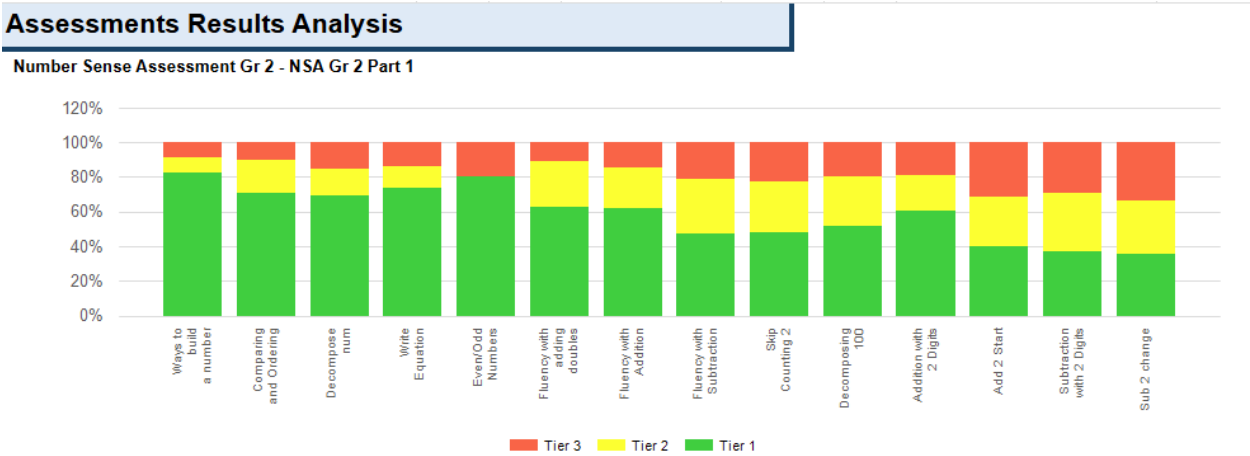

Report Shows each strand and the column chart highlights the Tier breakdown. Tier 1 is Proficient and Extending, Tier 2 is Developing, Tier 1 is Emerging.

Save the Report to a PDF if you need to
