

Topic	Good Practice for a Successful Reporting Period	Why is this important?
Standards 	FOIPPA Standards Review FOIPPA policy and practices to safeguard student information. All users should: <ul style="list-style-type: none"> • Lock their computer when stepping away from it for <i>any</i> length of time. • Keep passwords secure; do not share them with another user, or record them where they could easily be found. 	Ensuring that student and other sensitive Information is safe from purposeful or unintentional exposure is everyone's responsibility. Establishing and maintaining good daily practices will prevent serious potential security and privacy risks for MyEducation BC, including: <ul style="list-style-type: none"> • Data corruption • Loss of data • Exposure of sensitive personal information
Access 	Log-ins Only have one active log-in on one browser at a time.	This reduces the number of active accounts logged into MyEducation BC and enhances performance. Furthermore, it reduces the possibility of a conflict when updating and saving data that can occur when two accounts with the same log-in credentials are open e.g. marks or comments entered in one of the open sessions are not saved as expected.
Access 	Logging Off Use the Log Off button in the menu bar when exiting the system. 	This ensures your session is properly closed, contributing to system security, and optimizing system resources.
Access 	Do not share log-in credentials! <i>Never share your login ID and password with another user.</i> Each user is required to have unique log-in credentials so that they will only be able to access information to which they are entitled.	This is important to ensuring data security and integrity. Each user is responsible for the activity in the system that takes place using their log-in credentials.

<p>Performance</p> 	<p>Clearing the Browser Cache</p> <p>Periodically clearing your browser's cache, especially after application enhancements and upgrades, can enhance user experience with MyEducation BC. For browser specific instructions: http://www.refreshyourcache.com/en/home/</p>	<p>Refreshing your cache will ensure that the browser is reflecting the latest application upgrades.</p> <p>For a quick page refresh, use F5 on a Windows machine and Command-R on a Mac.</p>
<p>Data Integrity</p> 	<p>Ensure the support documentation you are using is current and applicable</p> <p>When referring to MyEducation BC documentation for instruction or customizing for training, ensure you are referencing the latest version.</p> <p>Aspen resources, available via the Help menu in MyEducation BC, should be referenced only where BC specific resources do not exist. Even then, the information may or may not apply.</p>	<p>MyEducation BC documents are continually updated as the application evolves and as upgrades and enhancements are applied.</p> <p>This is particularly important when viewing learning event recordings where a document was distributed online during the session. The document is likely not the most current. Always refer to the MyEdBC Resources list on the Level 1 Information Station > Support Resources to ensure you have the latest version.</p>
<p>Data Integrity</p> 	<p>Pop-Up Windows and Warnings</p> <p>Stop and read these! Understand what they are saying before proceeding. Cancel the process if you are not sure.</p>	<p>MyEducation BC has a great deal of flexibility and functionality for updating multiple records at one time.</p> <p>Failure to read and understand the warnings and messages can result in time-consuming manual data corrections.</p> <p>Example: A date field can be populated through mass update but cannot be set to blank through mass update.</p>
<p>Access</p> 	<p>Terms and Current Classes</p> <p>Occasionally, especially during mark entry and report card cycles, teachers report that they can't see any of their current classes.</p>	<p>In most cases, this is because Grade Terms are not set up concurrently – i.e., if a Grade Term ends on a Friday and the next one doesn't open until the following Monday, no classes will display over the weekend because the default filter is set to <i>Current Classes</i>.</p> <p>Changing the filter to <i>This Year's Classes</i> will display all classes regardless of the Term dates.</p>
