Release Highlights		
Change Request Number	**Function**	**Changes**
156336	School Transcript	Modified the school transcript logic to: • Exclude current year schedule courses that are flagged as 'hide on transcript' (schedule top tab> courses side tab > Hide on Transcript selected). • Remove the leading zero from Final mark.
156336	PSR	Modified PSR to correct the exception error that some schools reported receiving when generating PSRs for a selected group of students.
156336	GDE	Updated the "Student Period Absences" extract to remove the duplicate "School Number" column.
156336	Learning Plan (Education Plans)	Added the ability to create: • Student Learning Plans. • Student Behavior/Safety Plans. • Proficiency Plans. These new plans can be accessed from *Student > Ed. Plans*. Use the dictionary to select *Plan Definition > Options > Add*.
157072	Diploma Verification Report	• Modified to display the completion date for course in progress (courses from Student schedule). • Corrected the exception error that occurred for students with blank school course code on student transcript details.
154237	Configuration	Previously not all Diploma Categories were fully populated with all possible courses from all years and all Graduation Programs. Now, all Graduation Program Diploma Categories contain all courses necessary for graduation. This affected the Graduation Progress screen.

157072	IEP	• Modified the IEP so that users are able to save the Adjudication changes. • A new field 'Person Responsible' was added to the objective tab and displayed on the IEP Report. • Modified IEP Workflow to display student name in the breadcrumbs. • Modified IEP Report to display the support team members. • Designation alert now displaying generic message. • Student grade displaying on IEP report.
156404	BC Credit Calculation Procedure	This procedure is run from the School view > Grades top tab > Transcripts side tab. It updates credits based on course final marks or, if available, blended marks. Previously, this procedure only calculated credit based on final marks. This fix now also calculates credit based on the blended mark.
157013	Configuration	Updated the security roles • Student Services – School • Student Services: Enroll & Read – School • Student Services: Read only- School with the following: • Added Read-only access to Special Education > IEP Access Log • Removed the Side tab > FTE • Removed the Side Tab > Reference • Removed the Side Tab > Publish Log
156777	Configuration	Updated the SADE Reporting periods in MyEducation BC
157073	Conversion	Student records in Cohort 4 schools were showing in the correct school but schools reported they were not able to take attendance or enter marks for them. Our investigation confirmed that the records were connected to the correct school but the wrong district. A fix was implemented to correct this by matching the school to the correct District.
