Subject: BC School Transcript Report - Important Update!

This evening, Thursday, March 12, 2015, we implemented the following BC School Transcript Report changes in all MyEducation BC environments (*see Note below*):

- If a student has taken a course more than once, i.e. multiple records exist for the same course, the one that is in progress or the one with the highest mark will display.
- Some completed courses with a final mark were not displaying; this has been corrected.

Note: MyEducation BC SDTest is currently offline being refreshed with a pre-conversion snapshot of MyEdBC Production. It will be available again by noon tomorrow, March 13, 2015. While the Production environment is offline for Cohort 5 conversion (March 13-19), Districts will be able to use SDTest to produce Student Transcripts, if required.

When producing Student Transcripts, please keep the following settings in mind:

- The “Print Expectation of Graduation” message will only display accurately if 100% of the required courses have been completed. Please refrain from choosing this option if this is not the case.
- In the event that a student completes a required course in a grade that does not match the course grade (e.g. a grade 9 student completes English 10), please select the “Include Grade 8 and 9 courses” option to ensure that this course will display.

Thank you for your cooperation while we continue to work towards a permanent solution for these items.
