MyEducation BC / BCeSIS Release Notes

Implementation Date
September 13, 2015

Summary	Details	Change Type
Student Information Verification Form	The default print option for the Student Information Verification Form has been set to "Print on Both Sides." This corrects the situation that was occurring in some cases when a selected printer was set to print double sided by default and some student's information exceeded two pages. Additionally, layout adjustments were made to: • Provide sufficient space in the report header for the Pupil Number, Homeroom and Teacher Name • Allow School Logos to display correctly, and • Prevent truncation of the Student Email	Correction to Existing Functionality
Duplicate Courses in Cohort 6 Schools	A fix was implemented to correct the duplicate courses that were displaying on the PSR and Diploma Verification Report for Cohort 6 districts only.	Correction to Existing Data
1701 and Class Size	Conversion did not apply Course Funding Codes or Subject Areas which was affecting both 1701 and Class Size reports. These were updated in the Enterprise and District level course catalogues.	Update to Existing Data
