MyEducation BC / BCeSIS Release Notes

Implementation Date
September 19, 2015

Summary	Details	Change Type
1701 International Report	A fix was implemented to resolve the Exception Error that users were encountering when running the 1701 International Report.	Correction to Existing Functionality

1701 Extracts	• A fix was implemented to resolve the file name of the 1701 extracts which are now being generated in the correct format.
	• The 1701 extracts will no longer fail due to incomplete student data. The following are now being excluded from the extracts so that they will complete successfully:
	   ○ Students who do not have a birth date (Resolution: sort by birthdate and enter the missing data.)
	   ○ Students who do not have a 'Person' record (Resolution: These students are quite easily identified as their Name fields will be blank. Please submit a Pando ticket with "1701 Student correction" in the summary, providing the missing student details and requesting that the record(s) be updated.)
	   ○ Students with courses that are not attached to a District course. (Resolution: We ran a script to identify these students and contacted the affected Districts.)
		Correction to Existing Functionality
